SAFETY INFORMATION

1. Identification of Hazards	Strap and frame hinges do not pose a health or safety risk if used as intended and installed and operated correctly. Caution should be exercised during installation and use, as they may have sharp edges or heavy moving parts that could cause a risk of pinching, impact, or cuts.
2. Hazardous Substances	Strap and frame hinges do not contain hazardous substances as defined by Regulation (EC) No. 1907/2006 of the European Parliament and of the Council of 18 December 2006, Articles 31 and 33 (REACH).
3. Waste	Waste generated from the use of hinges (e.g., damaged or worn hinges, packaging) does not pose a risk to the user, provided it is disposed of in accordance with applicable legal regulations. For larger elements, particular attention should be paid to proper storage and transportation to avoid injuries.
4. Personal Protective Equipment	During the installation or dismantling of strap and frame hinges, personal protective equipment should be used, such as protective gloves, safety footwear, and, if necessary, eye and hearing protection, in accordance with occupational health and safety regulations.
5. Recycling	Strap and frame hinges can be recycled after dismantling. The materials used are not harmful to the environment if properly handled in compliance with regulations. Metal parts should be segregated and delivered to secondary raw material collection points.
