**SAFETY INFORMATION**

|                                  |                                                                                                                                                                                                                                                                                                                                                                                            |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Identification of Hazards     | Ground-mounted pole bases do not pose a health or safety risk when properly installed and used as intended. However, they may have sharp edges, so caution should be exercised during handling and installation.                                                                                                                                                                           |
| 2. Hazardous Substances          | Pole bases do not contain hazardous substances as defined by Regulation (EC) No 1907/2006 of the European Parliament and the Council (REACH).                                                                                                                                                                                                                                              |
| 3. Waste                         | Waste generated during installation (e.g., packaging, damaged components) does not pose a risk to the user if disposed of in accordance with applicable legal regulations. It is recommended to separate waste and deliver it to an appropriate collection point.                                                                                                                          |
| 4. Personal Protective Equipment | <p>During the installation of pole bases, personal protective equipment (PPE) must be used in accordance with health and safety regulations, including:</p> <ul style="list-style-type: none"> <li>• Protective gloves – to prevent cuts,</li> <li>• Safety footwear – to protect against foot injuries,</li> <li>• Safety glasses – when performing drilling or cutting tasks.</li> </ul> |
| 5. Recycling and Disposal        | Dismantled pole bases do not pose an environmental threat and can be recycled. It is recommended to dispose of the material at appropriate metal recycling facilities or follow legal disposal guidelines.                                                                                                                                                                                 |
| 6. Installation Recommendations  | <p>Ensure the ground is properly prepared and stable before installation. Use appropriate anchors and fasteners as specified in the manufacturer's technical instructions.</p> <p>After installation, check the stability of the structure before use.</p> <p>Following these guidelines will ensure safe use of the pole bases and minimize the risk of accidents.</p>                    |
