PRODUCT INSTRUCTIONS FOR USE (OPERATION)

1. Type	Distance screws for wood are intended for general use. During work, care should be taken with sharp tips and the risk of damaging the material or tools. It is recommended to use caution when screwing and to wear appropriate protective equipment (e.g., gloves).
2. Application	Distance screws are used to join wooden elements while maintaining a gap between them. They are useful in roof renovations with significant level differences in the surface, for leveling battens, and when mounting and aligning façades vertically.
3. Usage/Assembly	Screws should be used with wood and similar materials, such as OSB or MDF boards. Installation should be careful and done with proper tools, e.g., a screwdriver or drill driver. In harder wood, it is advisable to pre-drill a pilot hole.
4. Maintenance	Long-lasting durability is ensured through regular technical inspections and maintenance. The owner of the facility is responsible for monitoring the technical condition of the fastenings during operation. Any damage to the protective coating should be immediately secured to prevent corrosion.
5. Storage/Protection	Screws should be stored in a dry place, away from moisture and dirt. It is best to keep them in the original packaging to prevent damage.
6. Transport	Screws should be transported in the manufacturer's original packaging, protected against shocks and contact with moisture to prevent surface damage and loss of mechanical properties.

SAFETY INFORMATION

1. Identification of Hazards	The products pose no risk to health or safety, provided they are used as intended and the structures built from them are properly maintained. The products may have sharp edges.
2. Hazardous Substances	The products do not contain hazardous substances as defined in Regulation (EC) No. 1907/2006 of the European Parliament and of the Council of 18 December 2006, Articles 31 and 33 (REACH).
3. Waste	Waste generated from the use of the product (packaging, damaged, or destroyed products) does not pose a hazard to the user, provided it is disposed of in accordance with applicable legal regulations.
4. Personal Protective Equipment	Personal protective equipment must be used in accordance with occupational health and safety regulations.
5. Recycling	Material remaining after the demolition of a structure poses no threat to the environment.
